

01-29-2013 Meeting Notes

- Review of Project Initiation Document / Project Plan
 - What specific outcomes does IBM want from the project? i.e., what deliverables does IBM expect?
 - Getting environments up and running
 - Allow faculty to start using it
 - Determine specific use cases and evaluate OpenStack's ability to support those use cases
 - Is there any way for measuring the success of the project?
 - Evaluate how well OpenStack can support use cases suggested by faculty and other stakeholders
 - Sign-off
- Is there a coding standard that we should follow for any original scripts. etc. that may be written as part of the project?
 - for Python code, PEP 8 and OpenStack Nova Style Commandments
 - shell scripts: DevStack contributing guidelines
- Action items
 - find out what happened to last year's hardware
 - make contact with faculty/staff regarding OpenStack use cases
 - continue working on documents
